

Seattle Neighborhood Demographics

This data frame compares the ethnic demographics in neighborhoods of Seattle, Washington in 2010 and 2020. Each neighborhood is grouped together by blocks therefore, certain demographics will vary in population. The data frame will demonstrate the drastic changes in ethnic demographics by 2020.

Why is this relevant?

Seattle is a diverse city. However, specific neighborhoods occupied by different ethnic groups declined in population when people of white background moved in. It is critical to raise awareness of these statistics, as people of color are being displaced in neighborhoods they've lived in for generations.

What is the Main Focus?

- The data frame focuses on three neighborhoods: Beacon Hill, International District, and Central District. We've comprised statistics of different ethnic groups in each neighborhood.
- Each column is differentiated by either the year 2010 or 2020
- Some ethnicities are not specified but are still labeled as POC, therefore the data frame gives a fair judgment to the unlabeled demographics

Column	Description	Data Type
Neighborhood	Categorizes the demographic population by Neighborhood, Beacon Hill, International District, Central District	character
Total_pop_2010	Summarizes entire population of every neighborhood of all ethnic backgrounds in the year 2010	numerical
poc_pop_2010	Unnamed people of color in certain neighborhoods in 2010	numerical
white_alone_2010	white population in certain neighborhoods in 2010	numerical
black_alone_2010	black population in certain neighborhoods in 2010	numerical
asian_alone_2010	asian population in certain neighborhoods in 2010	numerical
am_native_alone_2010	native american population in	numerical

	certain neighborhoods in 2010	
pi_alone_2010	pacific islander population in certain neighborhoods in 2010	numerical
hispanic_alone_2010	hispanic population in certain neighborhoods in 2010	numerical
other_alone_2010	unknown demographic population in certain neighborhoods in 2010	numerical
two_more_2010	people of color of mixed background population in certain neighborhoods in 2010	numerical
total_pop_2020	Summarizes entire population of every neighborhood of all ethnic backgrounds in the year 2020	numerical
